Douglas F. Busch  
*Vice President*  
*Director, Information Technology*  
**INTEL CORPORATION**

Doug Busch is Vice President and Director of Intel's Information Technology (I.T.) group. He is responsible for delivering information technology capability to Intel's employees worldwide, including voice and data networks, enterprise applications, engineering and manufacturing operations, and office and e-business solutions. Intel's I.T. organization services over 85,000 individuals in more than 70 countries.

Busch joined Intel in October 1987 and has held technical and management positions in manufacturing, logistics, and information technology. He was the principal architect of Intel's intranet and drove the introduction of advanced technology to improve manufacturing systems effectiveness. Prior to joining Intel, he managed research and development programs at Battelle Memorial Institute, including advanced automation programs for the aerospace and nuclear industries.

Busch received a bachelor's degree in Mechanical Engineering from Ohio State University and is a co-founder of The Information Architects Collaborative.
