

Peter Weill

B.E. (hons), University of Melbourne, 1978

M.B.A., University of Melbourne, 1984

M.Phil, New York University, 1987,

Ph.D., New York University, 1988

Director, Center for Information Systems Research &
Senior Research Scientist
MIT Sloan School of Management

Before joining Sloan as Director of CISR, Peter was Foundation Professor and Chair of Management (Information Systems) and the Director of the Centre for Management of Information Technology (CMIT) at the Melbourne Business School (MBS) at the University of Melbourne. Peter has developed and taught programs for MBA and executive education that focus on the business value of information technology and e-business. His research centers on the role and value of information technology (IT) in organizations. Peter has published widely including award winning books, journal articles, and case studies. Peter has been an Associate Editor for *MISQ* and *ISR* and is a program co-chair for ICIS 2000 in Brisbane. Peter regularly advises corporations and governments on issues of IT investment and pay off and aligning the IT portfolio to business strategy. Peter and Marianne Broadbent are co-authors of a book, now in its fourth printing, entitled "Leveraging The New Infrastructure: How market leaders capitalize on information technology" published by Harvard Business School (HBS) Press in 1998. Peter and Mike Vitale authored another book for HBS Press entitled "Place to Space: Migrating to e-Business Models " that was published in April 2001. Peter was a member of the Board of Directors of MBS and continues his association as a MBS Professorial Fellow.
